Software Engineering – Group5

Prepared by: Ruicheng Peng, Shusheng Song,

Haofan Cui, Wenhao Li

Dec.7 , 2018

Individual contribution

	Ruicheng Peng	Wenhao Li	Shusheng Song	Haofan Cui
Login module		X		
Mission list module	X			
Count-down module			X	
Store module				X
Integration	X			
UI tests	X	X		

Every module is in a specific folder in our project

Project Management

Project ownership

Considering that we have only four members in our team, our team will be first divided into three small parts and reunion later. In our project, the main purpose is creating the missions list (aka. "Schedule" part) and provide functional operation on mission list. And the reward part can be realized separately then combine with the others. Therefore, we assign individual work below.

Wenhao is going to work on the login system (UC 1-3),

When Ruicheng will be implementing the UI interface of missions list (UC4-7)
While Shusheng will work on the count-down (UC 8-10).

In the meanwhile, Haofan will work on the "store" section (UC12-13).

Every week, we plan a discussion in person. During the meeting, we will have a specific agenda that primarily involves the week's project progress and the documents going to submit. Our discussion will be centered at these questions: 1) What did you do on this past week? 2) What do you plan to work on next week? 3) How's your part connecting to others and how to realize it?

Merging Contributions

We wrote this document individually, but we have a meeting every week to share our progress and keep everyone in the right pace. More importantly, we have to make the connection of

each part clear and dependent. Finally, we all send our part to Ruicheng Peng and he unites the format of the whole document
